WORK EXPERIENCE

Software Engineer

Renault Nissan Technology and Business Centre India.

04/2023 - Present

Chennai, IN

Achievements/Tasks

- Advanced from **Graduate Engineering Trainee** to **Full-Stack Developer** after successfully **accelerating product updates by 50%** and enhancing system functionality through optimized coding solutions.
- Designed, developed, and maintained **Symbioze** - a **connected car services simulation tool** using **Angular** and **Spring Boot**, improving **integration efficiency by 30%** and supporting seamless operation across **connected vehicles**.
- Enhanced user experience** by modernizing the application, migrating from **AngularJS** to **Angular**, leading to a **20% reduction in load times** and increased user satisfaction.
- Led the migration of the **JMeter testing environment** to **Google Cloud Platform (GCP)**, significantly **improving scalability and reducing simulation time by 40%**.

Graduate Engineer Trainee

Renault Nissan Technology and Business Centre India.

08/2022 - 04/2023

Chennai, IN

Achievements/Tasks

- Developed and deployed** software solutions in an **Agile environment**, gaining hands-on experience in full-cycle development and real-time project execution. **Accelerated feature delivery by 25%** and resolved **50+ production issues**, enhancing system performance and reliability.
- Designed and implemented **RenoQuizz**, a web-based assessment tool for **50+ Graduate Engineer Trainees (GETs)**, enhancing training evaluation accuracy and **streamlining result analysis**.
- Developed and maintained web applications** using **Angular**, **Spring Boot**, and **SQL**, optimizing system efficiency and ensuring seamless user experience.

EDUCATION

Bachelor of Techonology in I.T

S.K.R Engineering College / Anna University

2018 - 2022

CGPA - 8.1/10

Higher Secondary Education

Arignar Anna Government Hr. Sec. School

2016 - 2018

Percentage - 68%

SKILLS

PROJECTS

SYMBIOZE - Connected Cars Services Simulation Tool (01/2023 - Present)

- Symbioze is a simulation and testing tool designed to validate connected car services. It ensures reliable communication between Vnext Technology and connected vehicles via Google Cloud Platform.
- Developed a **simulation and testing tool** for connected vehicle services, ensuring **reliable communication** via Google Cloud Platform (GCP).
- Built and maintained **RESTful APIs** using **Spring Boot**, enabling seamless data flow between vehicles and backend services.
- Wrote **JMeter simulation scripts** to automate simulation testing of connected cars services, reducing validation time and improving efficiency.
- Collaborated with **cross-functional teams** to enhance integration, increasing system reliability by **30%**.

RENOQUIZZ - Web Application (08/2022 - 01/2023)

- Designed and implemented **RenoQuizz**, a web application for conducting assessments for **50+ Graduate Engineer Trainees (GETs)**.
- Developed the frontend using **Angular** and backend with **Spring Boot & PostgreSQL**, ensuring a smooth and scalable application.
- Integrated **JWT authentication** and implemented **CRUD operations**, improving system security and usability.
- Automated result processing, **reducing evaluation time by 40%** and enhancing training assessment accuracy.

ACHIEVEMENTS

Client Champion Award

Received for outstanding performance and service.

Trailblazer Award

Received for demonstrating creativity and Innovation.

RNTBCI Toastmasters Club - VP (2023 - Present)

Leading the club to **enhance public speaking, leadership, and communication skills** among members.
